All Certificates of Deposit or Repurchase Agreements are collateralized in a Joint Custody Account at the Federal Reserve Bank (FED) or through the Trust Department of the respective bank that the investment is with.

All Treasury Bills are held for the City of Manchester in a customer account at the "FED".

The NH-Public Deposit Investment Pool (NH-PDIP) is a Cash Management Program created by the State of NH Banking Commissioner and Advisory Committee, specifically for New Hampshire public entities. Interest rates change on a daily basis and are determined using the amortized cost valuation method of all the instruments held in the portfolio at a designated time each day. For simplicity, on this schedule, the rate reflected is the average daily rate that was in effect for the month reported. The funds held in the pool are not invested for a specified duration of time, because one of the features of the pool in addition to the rate structure is liquidity.
